

Looks can be deceiving.... with new HVM PAS 68 Compact Terra Barrier

The Automatic Drop Arm Barrier successfully impact tested to BSi PAS 68:2010 with a boom length of 6000mm.

The Compact Terra Barrier looks like any standard car park barrier, but looks can be deceiving! Frontier Pitts have added its latest Perimeter Security Technology (PST) to the barrier to create the first BSi PAS 68:2010 drop arm barrier to completely stop within the barrier aperture a 3500kg vehicle travelling at 30mph (48km/h).

The standard aluminium boom is fitted with a high tensile cable and the barrier requires a shallow foundation depth of only 500mm. Boom lengths are available up to 6000mm

The Compact Terra Barrier is a drop arm automatic barrier which has been successfully impact tested in accordance with BSi PAS 68

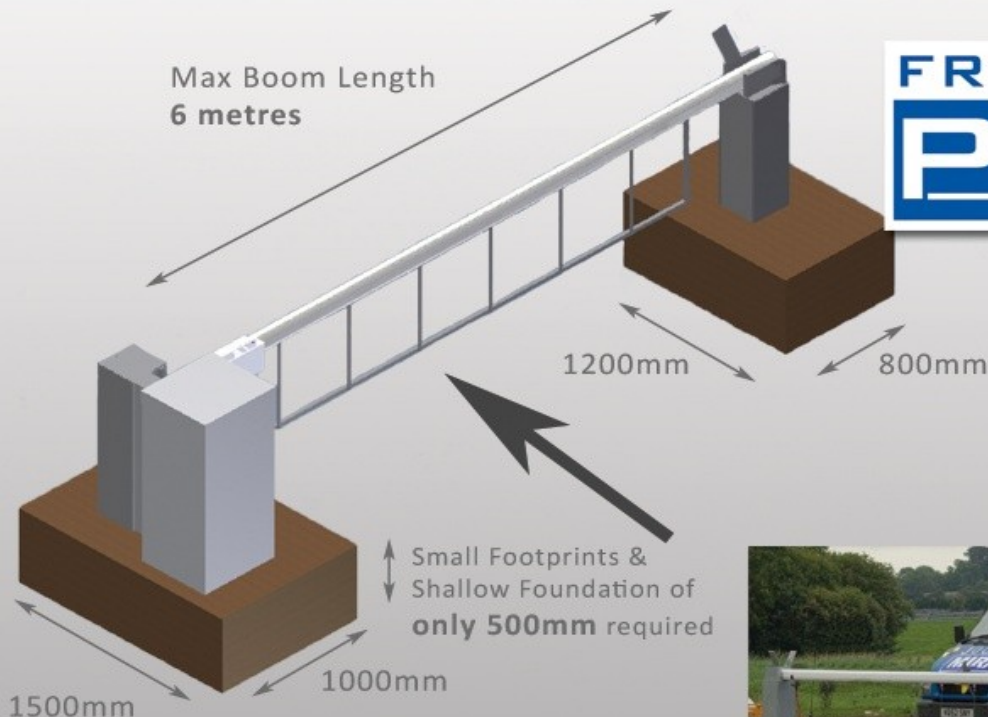

BENEFITS & FEATURES

- A wide range of Accessories are available

**COMPACT TERRA BARRIER SUCCESSFULLY PAS 68
IMPACT TESTED STOPPING A
3500kg VEHICLE TRAVELLING AT 48km/h**

As health and safety has always been the priority with all Frontier Pitts products, a range of accessories (including induction loops, photocells and traffic lights) are available for the Compact Terra Barrier.

Frontier Pitts have developed the Compact Terra Barrier for our customers who require aesthetically pleasing high security PAS 68 protection which is subtle in its capabilities.

The Anti Terra Drop Arm Barrier range has been PAS 68 impact tested with an energy range of 350kJ - 1850kJ and includes the Terra Ultimate Barrier (7500kg @ 50mph) and the Terra Barrier (7500kg @ 40mph).

Compact Terra Barrier Classification code: V Drop Arm Barrier 3500(N1)/48/90:1.5/0.0

Looks can be deceiving.....
